

Is your keiki having a dental emergency?

Dental emergencies can include:

- Painful swelling in, or around, the mouth;
- Pain in a tooth, teeth, or jaw bone;
- Gum infection with pain or swelling;
- Broken or dislocated tooth or teeth.

If so, reach out to your regular dentist right away.

But if you don't have a dentist, call us for triage and care.

Hawai'i Island Community Health Center

*Appointments are recommended—but not required—for emergency keiki dental care.
Bring your Quest/insurance card + a list of your keiki's current medications.*
